About Me

PHINMA Araullo University Student

I am a student interested in technology, especially in creating applications and systems. I am continuously learning and developing my skills to become better in programming.

Mobile Development 85%

Cloud Computing 70%

Data Analytics 75%

Networking Basics 80%

Software Architecture 65%

Special Someone

My Partner in Crime

Someone who knows how to understand how to stay and how not to give up easily. She's not perfect but she's real and that's what I love the most about her.

> *Whenever I'm with her everything feels okay. No matter how tired or stressed I am, it all fades because she's there. She doesn't need to be anyone else; being herself is already enough. Out of everyone in this world, she's the one I chose and I would still choose her every single day.*

Portfolio

My Projects

Student Task Manager App

A mobile app that helps students organize their tasks and deadlines efficiently.

Attendance Monitoring System

A system that records and tracks student attendance using cloud storage solutions.

Online Grade Viewer

A secure dashboard that allows students to view their academic grades and track performance.
